CareerMatch

CareerMatch — Free AI Resume Analyzer & Job Matcher

CareerMatch is a free, browser-based resume analysis and job-matching tool that helps jobseekers understand how closely their resume aligns with a specific job description and prepare for the interview.

Website: https://resume-interview-analyzer.pratyushk824-786.workers.dev/

What is CareerMatch?

CareerMatch compares the readable text in your resume with the skills and requirements recognized in a target job description.

It helps you identify:

- Skills that match the target role
- Skills that may need improvement
- Relevant keyword gaps
- Resume improvement opportunities
- Quantifiable-impact and STAR-style writing prompts
- Common ATS-style formatting risks
- Interview questions to practise
- Evidence from your resume that can support your interview answers

The goal is simple:

Match your resume to the job, identify what you need to improve, and prepare for the interview.

Key Features

1. Resume & Job Matching

Compare your resume against a specific job description to see relevant skill overlap.

2. Skills Gap Analysis

Identify skills recognized in the job description that are not currently recognized in your resume.

3. Keyword Gap Detection

Find important job-related terms that may be missing from your resume.

CareerMatch

4. Resume Improvement Prompts

Get practical prompts for strengthening weak resume bullets and presenting your experience more clearly.

5. STAR-Style Bullet Improvement

Use structured prompts to turn weak experience statements into stronger, evidence-based resume bullets.

6. ATS-Style Format Risk Preview

Review common formatting and parsing risks associated with ATS-style application forms.

7. Interview Question Preparation

Generate skills-focused interview questions based on the resume and target role.

8. Interview Evidence Preparation

Identify experiences and evidence from your resume that can help you prepare stronger interview answers.

How CareerMatch Works

Step 1 — Upload Your Resume

Upload a **PDF, DOCX, or TXT** resume.

The maximum supported file size is **5 MB**.

Text-based PDFs work best. Scanned image-only PDFs may not contain readable text for comparison.

Step 2 — Add the Job Description

Paste the job description for the position you want to target.

Adding a job description allows CareerMatch to compare your resume with the requirements of the specific role.

Step 3 — Review Your Match

CareerMatch identifies recognized skills appearing in both your resume and the job description.

The report can show your overall skill overlap and the skills that may need attention.

Step 4 — Identify Gaps

Review the skills and keywords that appear relevant to the job but are not recognized in your resume.

CareerMatch

Only add a skill to your resume when it genuinely reflects your experience or knowledge.

Step 5 — Improve Your Resume

Use the improvement prompts to strengthen resume bullets, communicate impact, and present your experience more effectively.

Step 6 — Prepare for the Interview

Review the interview questions and evidence identified by CareerMatch and use them to practise for the target role.

Who Is CareerMatch For?

CareerMatch is designed for:

- College students
- Recent graduates
- Internship applicants
- Jobseekers
- Software developers
- Data and AI candidates
- Career changers
- Professionals applying for new roles
- Candidates preparing for interviews

Example

Imagine you are applying for a **Python Developer** position.

You upload your resume and paste the Python Developer job description.

CareerMatch can help you identify:

Matching skills

- Python
- SQL
- Git

Skills to improve

CareerMatch

- Testing
- Docker
- REST APIs

Keyword gaps

- Relevant terms recognized from the target job description

Interview preparation

- Questions related to the skills required by the role
- Evidence from your resume that you can use when answering questions

This gives you a practical checklist before applying or attending an interview.

Understanding the Match Score

The match percentage is intended as a **guide to skill overlap**, not a hiring prediction.

CareerMatch calculates the percentage using recognized skills from the job description and checks which of those recognized skills are also present in the readable resume text.

The score:

- Is not an employer's ATS score
- Is not a hiring probability
- Does not predict whether you will receive an interview
- Does not represent the decision of a recruiter or employer

Different employers and ATS platforms use different criteria.

Use the result as a starting point for reviewing your resume rather than as a guarantee of application success.

ATS-Style Analysis

CareerMatch includes an educational **ATS-style format-risk preview**.

It highlights common parsing risks that may affect applications using systems similar to platforms such as Workday, Greenhouse, Lever, and SAP SuccessFactors.

This is an educational simulation and **not a view of any proprietary ATS system**.

CareerMatch

Privacy

CareerMatch is designed with privacy in mind.

Resume analysis is performed **in the browser**, and the website states that your resume is not uploaded, saved, or sent by the website.

No account is required to create a basic report.

For privacy-conscious users, this allows resume analysis without creating an account or sending the resume file to a server.

Supported Resume Formats

CareerMatch currently supports:

- PDF
- DOCX
- TXT

Maximum file size: 5 MB

Text-based PDFs are recommended.

Scanned or image-only PDFs may not contain readable text that CareerMatch can compare.

Is CareerMatch Free?

Yes.

The current CareerMatch resume analysis experience is available **free of charge** and does not require an account to create a basic report.

The product may introduce additional services or features in the future.

AI & Accuracy Disclaimer

CareerMatch is a career-preparation and resume-analysis tool.

Its results should be treated as guidance rather than professional hiring advice.

The system recognizes specific skills and terms from the text it processes. It does not fully understand every synonym, context, proficiency level, or number of years of experience associated with a skill.

CareerMatch

Users should review the results and verify all recommendations before adding information to their resume.

Never add a skill, qualification, achievement, or experience to your resume unless it is truthful and supported by your actual background.

What CareerMatch Does Not Guarantee

CareerMatch does not guarantee:

- An interview
- Employment
- ATS acceptance
- A particular match percentage
- Selection by an employer
- A specific interview outcome

The purpose of CareerMatch is to help candidates prepare more effectively and understand the relationship between their resume and a target job.

Technology

CareerMatch is a web-based application deployed using Cloudflare Workers.

The project source code is publicly available on GitHub:

Frequently Asked Questions

Do I need an account?

No. The current basic resume analysis can be used without creating an account.

What resume formats are supported?

PDF, DOCX, and TXT files up to 5 MB.

Does CareerMatch store my resume?

The website states that resume analysis runs in the browser and that your resume is not uploaded, saved, or sent by the website.

Does the match percentage predict whether I will get hired?

CareerMatch

No. It measures recognized skill overlap between your resume and the target job description. It is not an employer ATS score or hiring prediction.

Can I use CareerMatch for any job?

Yes. You can provide a target job description and use the resulting analysis as a preparation aid.

Should I add every missing keyword to my resume?

No.

Only add a skill or keyword when it genuinely reflects your experience, knowledge, or work.

Can CareerMatch help with interviews?

Yes. The report includes interview questions to practise and helps identify relevant evidence from your resume for interview preparation.

Getting Started

1. Visit CareerMatch.
2. Upload your PDF, DOCX, or TXT resume.
3. Paste the target job description.
4. Generate your career report.
5. Review your matching skills and gaps.
6. Improve your resume using the provided prompts.
7. Practise the suggested interview questions.

Product Vision

CareerMatch aims to make job applications more practical and personalized.

Instead of sending the same resume to every job, candidates can use CareerMatch to understand:

What does this job require?

Which of those skills does my resume demonstrate?

What should I improve?

CareerMatch

How should I prepare for the interview?

CareerMatch turns those questions into a practical preparation workflow.

CareerMatch

Match your resume to jobs. Find skill gaps. Prepare for interviews.
